Panel Discussion on

THE FUTURE OF AUTOMATION

*with Peng-Sang Cau, Charles Deguire,
and Michael Cromheecke*

Market dynamics are shifting in unpredictable ways. Wrapped up within the many unprecedented forces at play is opportunity: with automation you can compete. With agility you can win. And as these cycles of change recur more frequently, agility will increasingly mean standardized, modular solutions capable of a wide breadth of tasks.

Join Peng-Sang Cau, ATS Life Sciences VP of Emerging Markets & Symphoni, as she shares her thoughts with panelists Charles Deguire (Kinova Robotics) and Michael Cromheecke (SteamChain) to discuss what the future holds for factory automation. Moderated by Rob Spiegel, Senior Editor at Design News.
